

Ideation Phase

Define the Problem Statements

Date	3 October 2026
Team ID	SWTID-2026-3698
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	A student or teacher who depends on school IT (Wi-Fi, projectors, accounts, computers) every day
I'm trying to	List their outcome or "job" the core about - what are they trying to achieve?	Report an IT issue quickly and get it fixed with minimal delay
but	Describe what problems or barriers stand in the way - what bothers them most?	My ticket waits for an IT agent to manually review it and pick a category and subcategory
because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Ticket classification is manual, slow and error-prone, and does not scale with daily requests
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Frustrated and unsure whether my request was received or when it will be resolved

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student or teacher	Report an IT issue (Wi-Fi, projector, password, slow computer)	My ticket waits for IT staff to review and categorize it	Classification is done manually, with no automation	Frustrated and unsure when help will arrive
PS-2	An IT helpdesk agent	Process tickets and route them to the right group quickly	I must read every ticket and pick its category myself	Callers enter free text and request volume grows daily	Overloaded and under pressure
